

ROHIT GUPTA

Full Stack Developer

+91-8546053970 | rg3050345@gmail.com | Noida, UP | [linkedin.com/in/rohit-gupta-33b5821b1](https://www.linkedin.com/in/rohit-gupta-33b5821b1) | github.com/rohitgupta7327

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in React.js, Node.js, Express.js, and RESTful API development. Proficient in JavaScript (ES6+), Python, SQL, and CI/CD pipelines. Experienced in Agile workflows, MVC architecture, and deploying scalable web applications. Adept at translating complex requirements into clean, maintainable code with measurable impact.

EDUCATION

B.Tech — Computer Science and Engineering	2023 – Present
Maharishi University of Information Technology, Noida, UP	
Intermediate — Class XII (UP Board)	2022
Mahatma Gandhi Intermediate College, Gorakhpur, UP	
Secondary — Class X (CBSE)	2020
Oxford Public School, Gorakhpur, UP	

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

Backend: Node.js, Express.js, REST API, JWT Authentication

Languages: JavaScript, Python, Java

Database: SQL, MySQL, PostgreSQL

DevOps/Tools: Git, GitHub, CI/CD, Netlify, Vercel, VS Code, Railway

ML/DS: Pandas, NumPy, Seaborn, Matplotlib

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

PROJECTS & EXPERIENCE

Personal Portfolio Website  *React.js | Tailwind CSS | Email.js | Netlify*

- Built a responsive SPA portfolio using React 19, React Router, and Tailwind CSS to seamlessly showcase technical projects and skills.
- Engineered fluid UI animations and interactive elements with Framer Motion, ensuring a modern and highly engaging user experience.
- Integrated EmailJS for serverless communication, enabling a fully functional client-side contact form without backend infrastructure.

CodeRoom  *React.js | Node.js | Express.js | Clerk | Stream | Inngest*

- Built a VSCode-powered collaborative coding platform enabling 1-on-1 technical interviews with real-time video, chat, and secure code execution in isolated sandboxed environments.
- Engineered room-locking logic to restrict sessions to 2 participants and implemented auto-evaluated feedback (success/fail) against test cases, improving interview reliability.
- Integrated Clerk for authentication, Stream for video/chat, and Inngest for async background jobs, with TanStack Query powering real-time dashboard stats and caching.

CERTIFICATIONS

Python Programming — Spoken Tutorial, IIT Bombay	2025
Microsoft Excel — Simplilearn, Powered by Microsoft	2026
AI in Data Science — NASSCOM Foundation & Capgemini	2026
